## DOINGS OF CONGRESS.

The Mexican Treaty Defeated --- The Case of General Fitz John Porter.

In the Senate, on Wednesday, the 16th inst., Mr. Plamb (Kan.), by request, submitted a joint resolution proposing an amendment to the Constitution prohibiting the manufacture or sale of intoxicating liquors in the United

The new joint rules were then taken up, and a spirited discussion arose in regard to the innguage of the clause prohibiting the sale of spiritneus or malt liquors in the Capitol building. It was finally decided to strike out the words "spirituous and malt" and insert the

word "intoxicating." Mr. Frye (Me.) said he had seen a man with his puntaloons inside his boots, and with his coarse blouse on, standing at the bar of a restaurant of one of the houses of Congress, drinking miserable whisky out of a cup.

"A tip cup?" inquired some member. "No. sir," said Mr. Frye, "a crockery cup; and I have seen whisky ordered again and again, and called "tea," and brought and served in a cup and saucer. Anybody-whether a member of Congress or otherwise-can sit down, order his "tea," and drink it—out of a cup. To me," he continued, "whether there is anything wrong in it or not, there is something utterly disgusting about it, and it is entirely nabecoming the character and dignity of the Capitol of the United States.

The electoral count bill was passed. It requires that the presidential electors shall meet on the second Monday in January, and that reject a vote. Where there is more than one return from a State, those certificates shall be the two houses, acting separately. This is the its adaptability for a soldiers and sailors' home.

## Danger Signals

Have you a cold in the head which does not get befter? Have you an excessive secretion of mucus or matter in the nasal passages, which must either be blown from the nose, or drop back behind the palate, or hawked or snuffled backward to the throat? Are you troubled by hawking, spitting, weak and inflamed eyes, frequent soreness of the throat, ringing or roaring or other noises in the ears, more or less impairment of the hearing, loss of smell, memory impaired, duliness or dizziness of the head, dryness and heat of the nose? Have you lost all sense of smell? Have you pain in the chest, lungs, or howels? Have you a hacking cough? Have you dyspepsia? Have you liver complaint? Is your breath foul? If so, you have Catarri. Some have all these symptoms, others only a part. The leading symptoms of ordinary cases of Cartarri is increased secretion of mucus of yellow or greenish colored matter.

Foul breath is caused by the decomposing secretions exuded from festering ulcers far back in the head; sometimes the membrane covering the bones is eaten away, and the bones themselves gradually decay. Such cases are indeed objects of pity, as the steach from the corroding sores reveals the corruption within.

As every breath drawn into the lungs must pass over and become polluted by the secretions in the nasal passages it must necessarily follow that poisoning of the whole system gradually takes place, while the morbid matter that is swallowed during sleep passes into the stomach, enfeebles digestion, and often produces dyspepsia.
